OBJECTIVE

To obtain a challenging position where I can leverage my relevant experience to contribute to the success and growth of organization.

EXPERIENCE

STELLAR INNOVATIONS
june-01-2022

software Engineer
I was captivated by the world of full-stack development. I immersed myself in the Laravel-PHP framework, and it has become my foundation for creating robust and scalable web applications.
I'm working with php scripts which is US - tax based project. I have a very well knowledge in my project as well as, I'm the manual tester in my team.

PROJECTS

MENSLOOK.DDNS.NET

Application for admin management system
This application is mainly build for home services that in busy life schedule without wasting their time clients should get their services by their own places with comfortable.

ABC-CHICKEN CENTRE

This application is build as an food order management services
Booking in rural zone which other applications are not available for food order management services.

LOGIN & REGISTER PAGE

I used to create login & register page laravel ,the fields of register with all the methods available like, drop-down, input fields, radio button, checkbox, date picker, Google signup, Google v2 captcha etc..
Which site dynamically works..

CRUD

I created crud operation in laravel framework with perfect databases of email credentials also I added Excel import and export package that makes easier to update a bunch of updates at a time..

ORDER MANAGEMENT SERVICE

As per the clients requirements if an order creation, delete, edit ,update, new should take place. And reflect in pdf of lhs the editable section should be in rhs.
Also order export import should be done by bulk uploads.
US based project which is selected by their countries and by selecting their states we should get filtered by counties.
And much more functionalitis are added as per the requirements.

PORTFOLIO

I had updated my online resume through live server using AWS and mobaxtream.
Also added SSL certificate for the security purpose.
